DIAGNOSTICS

COVID-19 TESTING

Your employer has chosen to partner with Incyte Diagnostics for COVID-19 testing needs.

Sample Type:

swab - NP, OP, Nasal

Turnaround Time:

24-48 hrs

Methodology:

Incyte utilizes a multiplex real-time PCR (RT-PCR) in vitro diagnostic test intended for the qualitative detection of RNA from SARS-CoV-2 from individuals who meet COVID-19 clinical and/or epidemiological criteria. In general, SARS-CoV-2 RNA can be detected during the acute phase of infection.
